

ETHNOBOTANY: A MODERN PERSPECTIVE

Ethnobotany: A Modern Perspective is a must read for those looking for a comprehensive, easy-to-use book on the subject. Divided into 11 chapters, with worksheets following each chapter, the reader is gradually introduced to complex relationships between cultures and the uses of plants. Ethnobotany requires a variety of different skills, such as botanical training for identification/preservation and anthropological training to understand the cultural concepts, but Dr. Rani Vajravelu breaks down these topics into organized, comprehensible sections.

From the dishwasher and microwave oven in the kitchen and the clock radio next to your bed, to the cellular phone you hold to your ear—sometimes for hours each day—exposure to EMR is growing and becoming a serious health threat. Read more... Genetics of Cancer Author: Dr. Magdy Aly Genetics of Cancer Genes are the heart and brain of our development. They dictate the color of our eyes, our complexion and most certainly our susceptibility to develop certain illnesses, among which, Cancer is one that we are most concerned about. Is there a way to determine if we are predisposed and carry a higher risk of developing certain cancers? Can we predict at what age we may develop an illness? And if so, what can, or rather, shall we do about it. Read more...
