

Great Feuds in Medicine: Ten of the Liveliest Disputes Ever

An exciting, well-researched work, which should appeal to anyone with an interest in the nature and progress of the human race. American Scientist The cataclysmic clash of medical ideas and personalities comes to colorful life. In this follow-up to the critically acclaimed Great Feuds in Science (Wiley: 0-471-16980-3), Hal Hellman tells the stories of the ten most heated and important disputes of medical science. Featuring a mix of famous and lesser-known stories, Great Feuds in Medicine includes the fascinating accounts of William Harveys battle with the medical establishment over his discovery of the circulation of blood; Louis Pasteurs fight over his theory of germs; and the nasty dispute between American Robert Gallo and French researcher Luc Montagnier over who discovered the HIV virus. An informative and insightful look at how such medical controversies are not only typical, but often necessary to the progress of the science.

From the dishwasher and microwave oven in the kitchen and the clock radio next to your bed, to the cellular phone you hold to your ear—sometimes for hours each day—exposure to EMR is growing and becoming a serious health threat. Read more... Genetics of Cancer Author: Dr. Magdy Aly Genetics of Cancer Genes are the heart and brain of our development. They dictate the color of our eyes, our complexion and most certainly our susceptibility to develop certain illnesses, among which, Cancer is one that we are most concerned about. Is there a way to determine if we are predisposed and carry a higher risk of developing certain cancers? Can we predict at what age we may develop an illness? And if so, what can, or rather, shall we do about it. Read more...
