

The Book of Water Volume One: Supply and Demand Concepts

I pose many questions that I intentionally don't answer. I want you to do that. I want everyone reading this book to think about some of these concepts. This is about concepts for solutions long-term and sustainable. If we want our environment to once again flourish and our agriculture and development sectors to continue growing, we must develop a national water policy and let that guide us into the future.

From the dishwasher and microwave oven in the kitchen and the clock radio next to your bed, to the cellular phone you hold to your ear—sometimes for hours each day—exposure to EMR is growing and becoming a serious health threat. Read more... Genetics of Cancer Author: Dr. Magdy Aly Genetics of Cancer Genes are the heart and brain of our development. They dictate the color of our eyes, our complexion and most certainly our susceptibility to develop certain illnesses, among which, Cancer is one that we are most concerned about. Is there a way to determine if we are predisposed and carry a higher risk of developing certain cancers? Can we predict at what age we may develop an illness? And if so, what can, or rather, shall we do about it. Read more...
