

The Cambridge Companion to Biblical Interpretation (Cambridge Companions to Religion)

This book provides the first complete guide for students to the present state of biblical studies. The twenty-one specially commissioned chapters are written by established scholars from North America and Britain, and represent both traditional and contemporary points of view. The chapters in Part One cover all the methods and approaches currently practised in the academic study of the Bible, while those in Part Two examine the major categories of books in the Bible from the perspective of recent scholarship - e.g. historical books of the Old Testament, Gospels, prophetic literature. Major issues raised are: the relation of modern critical study of the Bible to pre-critical and post-critical approaches; the place of history in the study of the Bible; feminist, liberationist and new historicist concerns; the relation of Christian and Jewish scholarship; and recent interest in the Bible as literature.

From the dishwasher and microwave oven in the kitchen and the clock radio next to your bed, to the cellular phone you hold to your ear—sometimes for hours each day—exposure to EMR is growing and becoming a serious health threat. Read more... Genetics of Cancer Author: Dr. Magdy Aly Genetics of Cancer Genes are the heart and brain of our development. They dictate the color of our eyes, our complexion and most certainly our susceptibility to develop certain illnesses, among which, Cancer is one that we are most concerned about. Is there a way to determine if we are predisposed and carry a higher risk of developing certain cancers? Can we predict at what age we may develop an illness? And if so, what can, or rather, shall we do about it. Read more...
