

Swamp Francolin: Its status in Suklaphanta Wildlife Reserve, Nepal

Swamp Francolin (*Francolinus gularis*), a globally threatened bird endemic to the Indian sub-continent is perhaps gradually declining owing to different natural and anthropogenic factors. In order to get familiar with the population status, habitat, and the conservation threats this study was undertaken at Suklaphanta Wildlife Reserve which is the westernmost extent of this bird in Nepal. Population status was estimated by using its unique voice as identification method, which is more pronounced at dawn and dusk and at its zenith especially during the breeding period (Feb-May). This method of call count from different survey points yielded a maximum of 90 pairs of birds to be present in the reserve. Analysis of habitat parameters collected in different quadrates showed that Swamp Francolin population and grass density are significantly correlated ($P = 0.070$, $df = 27$) with positive sign. The tree density and the birds number are significantly correlated ($P = 0.016$, $df = 27$) with negative sign. Thus we conclude that Swamp Francolin prefers the grassland habitat and tends to avoid the forest land.

From the dishwasher and microwave oven in the kitchen and the clock radio next to your bed, to the cellular phone you hold to your ear—sometimes for hours each day—exposure to EMR is growing and becoming a serious health threat. Read more... Genetics of Cancer Author: Dr. Magdy Aly Genetics of Cancer Genes are the heart and brain of our development. They dictate the color of our eyes, our complexion and most certainly our susceptibility to develop certain illnesses, among which, Cancer is one that we are most concerned about. Is there a way to determine if we are predisposed and carry a higher risk of developing certain cancers? Can we predict at what age we may develop an illness? And if so, what can, or rather, shall we do about it. Read more... Main Menu Home PROFILE Curriculum Vitae Professional Career Teaching Honors & Awards References Home Country Genetics Lectures
